OUR COMMITMENT TO THE ENVIRONMENT

Sodeca has begun a new stage of study and design of new trends in ventilation which will help to preserve the environment and to make the energy saving which so much concerns today's society.

In order to obtain an improvement in the energetic consumption, SODECA has adjusted the impellers in the maximum efficiency working area. For this reason there might be changes in the curves of this catalogue compared to previous editions.

SODECA has concentrated its activity on the production of industrial fans, ventilation systems and extractors for the removal of smoke in case of fire since 1983, when it was founded.

SODECA's fans and extractors are present in all European countries and in many parts of the world, thanks to the quality of the product and the methods of research and development used.

Our quality procedures used and certified by BUREAU VERITAS, in accordance with ISO 9001:2008, are another of the reasons which make **SODECA** one of the best and most renowned fan manufacturers in Europe.

Without a doubt, the most important factor to achieve our objectives is the human factor, the great professionals who work at your service, offering not only ventilation equipment but also solutions to any ventilation need required by our customers.

We sincerely offer you the possibility of visiting our facilities in Sant Quirze de Besora, with over 16,000 square metres of built area, where you will be able to see our fan manufacture with perfect clarity and with the highest standards of quality, complying with the ISO and AMCA standards.

This catalogue is only a small part of our possibilities. Do not hesitate to contact us. We will put all our experience and our human resources at your disposal.

FULFILMENT OF STANDARDS

SODECA's fans and extractors comply with the following standards:

QUALITY	
ISO 9001:2008	Sistemas de gestión de la calidad. Requisitos. Quality management systems -- Requirements
TESTS	
ISO 5801	Ventiladores industriales. Industrial fans -- Performance testing using standardized airways Industrial fans -- Performance testing using standardized airways
AMCA 210-99	Ventiladores industriales. Métodos de ensayos de ventiladores y su representación de ensayos. Laboratory Methods of Testing Fans for Aerodynamic Performance Rating
UNE 100212:1990	Ventiladores. Dispositivos e instalaciones para el ensayo de ventiladores.
ISO 13350	Ventiladores industriales. Ensayos de comportamiento de ventiladores de chorro. Industrial fans -- Performance testing of jet fans
ISO 13348	Industrial fans -- Tolerances, methods of conversion and technical data presentation
FANS FOR HIGH TEMPERATURES	
EN 12101-3:2002	Sistemas de control de humos y calor. Parte 3: Especificaciones para aireadores extractores de humos y calor mecánicos. Smoke and heat control systems - Part 3: Specification for powered smoke and heat exhaust ventilators
ACOUSTICS	
ISO 3744	Acústica. Determinación de los niveles de potencia acústica de fuentes de ruido a partir de la presión acústica. Método de ingeniería para condiciones de campo libre sobre un plano reflectante. Acoustics -- Determination of sound power levels of noise sources using sound pressure -- Engineering method in an essentially free field over a reflecting plane
BALANCE AND VIBRATIONS	
ISO 1940-1	Vibraciones mecánicas. Calidad de equilibrado Mechanical vibration -- Balance quality requirements for rotors in a constant (rigid) state -- Part 1: Specification and verification of balance tolerances
ISO 10816-1	Vibraciones mecánicas. Evaluación de las vibraciones de máquinas Mechanical vibration -- Evaluation of machine vibration by measurements on non-rotating parts -- Part 1: General guidelines
ISO 14694	Ventiladores industriales. Especificaciones para equilibrado y niveles de vibración Industrial fans -- Specifications for balance quality and vibration levels
SAFETY (Declaration of EC Compliance)	
EN ISO 12100-1	Seguridad de las máquinas. Conceptos básicos, principios generales para el diseño. Parte 1: Terminología básica, metodología. Safety of machinery -- Basic concepts, general principles for design -- Part 1: Basic terminology, methodology
EN ISO 12100-2	Seguridad de las máquinas. Conceptos básicos, principios generales para el diseño. Parte 2: Principios técnicos. Safety of machinery -- Basic concepts, general principles for design -- Part 2: Technical principles
EN 60204-1	Seguridad de las máquinas. Equipo eléctrico de las máquinas. Parte 1: Requisitos generales. Safety of machinery - Electrical equipment of machines - Part 1: General requirements
EN 294	Seguridad de máquinas. Distancias de seguridad para impedir que se alcancen zonas peligrosas con los miembros superiores Safety of machinery; safety distances to prevent danger zones from being reached by the upper limbs
ISO 13857	Seguridad de máquinas. Distancias de seguridad para impedir que se alcancen zonas peligrosas con los miembros superiores e inferiores. Safety of machinery -- Safety distances to prevent danger zones being reached by upper and lower limbs
UNE 100250	Ventiladores industriales. Seguridad mecánica de los ventiladores (equivalente ISO 12499)
ISO 12499	Ventiladores industriales. Seguridad mecánica en los ventiladores Industrial fans -- Mechanical safety of fans -- Guarding
DIRECTIVES	
Directiva 2006/42/CE	Directiva de máquinas Machinery Directive
Directiva 2006/95/CE	Directiva de baja tensión Low Voltage Directive
Directiva 2004/108/CE	Directiva compatibilidad electromagnética EMC Directive
Directiva 89/106/CE	Directiva productos de construcción Construction Products Directive (CPD)
ATEX EXECUTIONS	
Directiva ATEX 94/9/CE	Aparatos y sistemas de protección para uso en atmósferas potencialmente explosivas Equipment and protective systems intended for use in potentially explosive atmospheres
EN 14986	Diseño de ventiladores para trabajar en atmósferas potencialmente explosivas. Design of fans working in potentially explosive atmospheres
EN 13463-1	Equipos no eléctricos destinados a atmósferas potencialmente explosivas. Parte 1: Requisitos y metodología básica. Non-electrical equipment for use in potentially explosive atmospheres - Part 1: Basic method and requirements
EN 1127-1	Atmósferas explosivas. Prevención y protección contra la explosión. Parte 1: Conceptos básicos y metodología. Explosive atmospheres - Explosion prevention and protection - Part 1: Basic concepts and methodology

SV: Low noise in-line duct fans mounted in acoustic casing

SV/PLUS: Low noise in-line duct fans mounted in acoustic casing with 50mm insulation

SV/ECO: Low noise in-line duct fans mounted in acoustic casing with 50 mm insulation, fitted with EC motors

SV

SV/PLUS

SV/ECO

Fan:

- Acoustic casing covered with deadening material
- SV: Impeller with backward-curved blades, except models 125-150-200, with multi-blade impeller
- SV/PLUS: Multi-blade impeller for all models
- SV/ECO: Backward-curved impeller for all models
- Standard flanged inlet and outlet to aid installation on duct
- They are supplied with 4 base stands to aid installation
- Linear air circulation
- T-models are fitted with 1-5 minute adjustable timer.

Motor:

- Class F motors with external rotor incorporated thermal protector, ball bearings and IP54 protection
- Single-phase 230V.-50/60Hz. adjustable
- Max. air temperature to transport: + 50°C.
- SV/ECO: Highly-efficient brushless-EC motor, electronically controlled by means of a potentiometer of 10KΩ MTP010, or an external signal of 0-10VDC

Finish:

- Anticorrosive finish in polyester resin, polymerised at 190°C, after alkaline degreasing and phosphate-free pre-treatment.

Acoustic features

The specified values are determined according to free field measurements of sound levels in dB(A) at an equivalent distance of twice the fan's span plus the impeller's diameter, with a minimum of 1.5 m.

Sound power Lw(A) spectrum in dB(A) via frequency band in Hz. Maximum speed

NEOLINEO

In-line fans for small ducts with removable covers with Long Life ball bearings

- Fan:
- V0 flame-retardant plastic casing
 - External terminal board, with variable position
 - Quick and easy to install
 - T-models are fitted with timer

- Motor:
- Motors with Long Life ball bearings, IPX4 protection, two-speed and adjustable
 - Single-phase 220-240V. 50/60 Hz
 - Working temperature: -10°C +60°C

- Finish:
- Made from white, V0 flame-retardant plastic

PLATT

Extractor with multiple inlets/outlets and low silhouette

Low profile extractor, for installation in false ceilings and for the extraction of 4 different areas in family houses or apartments

- Designed for continuous operation, in horizontal and vertical positions
- Easy flow control in the extraction grilles themselves
- Perfect impeller and housing design to achieve high performance at low noise and power consumption levels

Construction:

- Support box and plastic outlets
- Upper structure made from galvanized sheets
- Air intake via 3 x 80 mm openings and 1 x 125 mm opening
- Air extraction via 1 x 125 mm opening
- Timer adjustable to 30 minutes

Motor:

- Motors with Long Life ball bearings, IPX4 protection, two-speed
- 230V single-phase. 50 Hz
- Working temperature: -10°C +50°C

HYGRO PLATT-ES

Low silhouette inlets/outlets extractor, designed for extraction via humidity-sensitive openings with electronically controlled brushless-ec motor

Low profile extractor, for installation in false ceilings and for the extraction of 4 different areas in family houses or apartments, where saving energy is an important factor

- Designed for continuous operation, in horizontal and vertical positions
- Exclusively for BE-ALIZE-H type humidity-sensitive grilles
- Perfect impeller and housing design to achieve high performance with low noise and high electrical efficiency (0.1 (w/m3/h))

Construction:

- Support box and plastic outlets
- Upper structure made from galvanized sheets
- Air intake via 3 x 80 mm openings and 1 x 125 mm opening
- Air extraction via 1 x 125 mm opening
- Timer adjustable to 30 minutes

Motor:

- Electronically controlled brushless-ec motor with long lasting ball bearings, IPX4 protection
- 230V single-phase. 50 Hz
- Working temperature: -10°C +50°C

CTD

Centrifugal roof fans for ventilation systems for houses

Centrifugal roof fans with low noise level, for ventilation systems for houses according to Technical Building Code

Fan:

- Sheet steel base plate.
- Impeller with backward-curved blades made from sheet steel
- Steel sheet rain deflector hood with anticorrosive protection
- Adjustable by variation of voltage
- Safety switch on request

Motor:

- Class F motors with external rotor, IP54 protection
- Single-phase 230V.-50Hz
- Max. air temperature to transport: -40°C.+ 70°C

Finish:

- Anticorrosive finish in polyester resin, polymerised at 190°C, after alkaline degreasing and phosphate-free pre-treatment

CA-ROOF

Centrifugal roof fans for chimney ventilation in houses

In-line centrifugal extractor, with built-in hood to carry out the extraction or impulsion of the air in individual dwellings or community housing

- Designed for continuous operation, in any position
- Possibility of supply with base or directly to pipe, according to the model

Construction:

- Galvanised sheet base plate.
- Impeller with backward-curved blades
- Galvanised sheet rain deflector hood
- Treated with anticorrosive paint

Motor:

- Motor with Long Life ball bearings, IPX4 protection
- 230V single-phase. 50 Hz
- Working temperature: -20°C +50°C
- Automatic thermal protector reset

CHRE

Centrifugal roof fans with low noise level

Centrifugal roof fans with low noise level and external rotor motor.

Fan:

- Sheet steel base plate.
- Impeller with backward-curved blades made from sheet steel
- Bird guard
- Sheet steel rain deflector hood with anticorrosive protection

Motor:

- Class F external rotor motors, IP54 protection
- Single-phase 230V.-50Hz., and three-phase 230/400V.-50Hz.
- Max. air temperature to transport: -25°C.+ 50°C

Finish:

- Anticorrosive finish in polyester resin, polymerised at 190°C, after alkaline degreasing and phosphate-free pre-treatment.

RCH

SI-VENT Accessories

Fan and chimney top for hybrid extraction in community housing

- Designed especially for the air extraction in houses or community housing, through chimneys or shunts. It makes it possible to maintain an attractive and uniform design throughout the building
- The Venturi version without fan, only for natural extraction
- The lightness of aluminium allows a fast and simple installation on roof

Construction:

- Manufactured in black pre-lacquered aluminium which is not altered by atmospheric agents
- Perfectly designed slats so as to obtain a high-performance Venturi effect
- Supplied voltage 230V. 50 Hz

- VENTURI: Natural operation without an extractor using the Venturi effect
- TEMPERATURA: Designed for the extraction of air in homes and barbecues with a maximum temperature of 150°C

On request:

- Measurements to fit any chimney

Versions:

- BASIC: It works with a switch or with a SI-VENT wind monitor

SYSTEM OF HYBRID VENTILATION (H.V)

This system is based on the extraction of air in a natural manner when the wind conditions outside are favourable whereas when they are unfavourable the extractor with an electric motor comes into operation to guarantee the minimum necessary extraction.

The start up of the electrical extractor is carried out by means of wind sensors, which are especially designed for this application

WIND CONTROLLER

SI-VENT, Wind sensor

The SI-VENT electronic wind controller is a highly robust and reliable device, made up of a sensor, a controller and the power supply.

The sensor is capable of measuring winds of up to 100 k.p.h. and the controller starts up the electrical extractor when the wind speed is below the programmed minimum wind value for five minutes.

RCH-400x800VM

Fan and chimney top for hybrid extraction in community housing

An assembly specially designed for controlled mechanical extraction through chimneys or condominium shunt chimneys. The system makes it possible to maintain a constant pressure in the installation, with the speed of the extractor self-regulated, obtaining the flow necessary at each moment according to the different needs of the installation, achieving a significant energy saving

- It makes it possible to maintain an attractive and uniform design throughout the house
- The lightness of aluminium allows a fast and simple installation on roof
- Measurements can be adapted to any chimney upon request

Construction:

- Manufactured in black pre-lacquered aluminium which is not altered by atmospheric agents
- Perfectly designed slats so as to obtain a high-performance Venturi effect
- Impeller unit with backward-curved blades with external rotor motor
- Adjustable differential pressure transmitter from 0...250 Pa, including screen for digital display and connection accessories

- Speed regulator by means of a frequency converter VSD1/A-RFM-0.5

Motor:

- Motor with Long Life ball bearings, IPX4 protection
- Converter supply, single-phase 230V. 50 Hz, output voltage from the converter to the motor, three-phase 230v. 50Hz
- Working temperature: -20°C +50°C

Working examples

TIRACAMINO

Fans to extract smoke in chimneys and barbecues

- Especially designed to extract smoke in chimneys and barbecues up to 200°C
- Equipped with an electronic speed regulator to adjust the smoke extraction flow rate
- Designed for continuous operation 200°C

Construction:

- Made from sheet steel with polyester resin to resist atmospheric agents
- Bird guard
- Supplied voltage 230V. 50 Hz

Motor:

- BASIC: works with separate switch or regulator

EDMF

Extra-flat bathroom fans with aesthetic and modern design

- Integrates harmoniously into the bathroom
- Ultra-silent
- Slim design with only 17mm
- High efficiency aerodynamic design
- Quick and easy to install

- Construction:
- White finish
 - Non-return hatch incorporated in all models
 - Built with recyclable materials

- Version:
- BASIC: works with the light switch or standalone
 - TIMER: works with adjustable electronic timer
 - LL: Long Life ball bearings

EDQUIET/S

Very low sound level and low consumption domestic extractors

- Integrates harmoniously into the bathroom
- High performance thanks to its low consumption motor
- Quick and easy to install

Construction:

- White finish
- Non-return hatch incorporated
- Equipped with diffusers to reduce air turbulence and noise levels

Versions:

- BASIC: works with the light switch or standalone
- TIMER: works with adjustable electronic timer

Motor:

- Single-phase 220V-240V .50/60 Hz
- High-efficiency motor
- Ball bearings to work over 40.000 hours
- Motor equipped with Klixon

ECONOMIC

Economic air curtains for small commercial premises

Economic air curtains for heights of up to 3m, for horizontal installation, specifically designed for small commercial premises

Construction:

- Painted metal structure
- Designed to be installed in a horizontal position
- S version: Two-speed fan operation
- LED operation indicator
- Support for assembly wall
- E Version: Electric battery control with safety elements. Delayed fan stop for evacuating residual heat delayed

Version:

-  Environmental: Re-circulate air
-  Electric: Incorporates electric resistors

External control

- E version: Remote control

Applications: Small commercial premises / shops / bars / offices

RECUP/LC

Configurable heat recovery units with crossed flow plates for horizontal installation

Features:

- Aluminium plate heat exchanger with 50% yield.
- Multi-position configurable outlets.
- F6, F6+F8, F7, F7+F9 or G4 efficiency filters, incorporated in the equipment. Other combinations possible upon request.
- Designed for installation in a false ceiling.
- Access to filters and components via front panel.

Build:

- Galvanised sheet steel structure with soundproofing.
- Interchangeable inlets and outlets with watertight joints.

- Access doors for easy maintenance and cleaning.
- Condensate drain integrated in the access cover.

Versions:

- Environmental: Air renewal, without heat supply (S)
- Electrical: Heat supply via electric batteries (EB)
- Water battery: Heat supply via water batteries (WB)

On request:

- Adiabatic module.

Characteristic curves

Characteristic curves

Configurations

Standard delivery configuration C. All models allow inlet and outlet configuration directly at the installation premises, except the 45, 60 model which only allows the air inlet configuration.

AF: Outside fresh air / IL: Pressurised air to room / SV: Stale air output / EL: Air extraction from room

Top view diagrams, for placement of the equipment in the ceiling. With maintenance access in the bottom panel
